

Year of the Rat

Directions, Challenges & Solutions

2) **SOUTH** – An area for wealth - Challenging area this year – “Star of Illness” (especially the stomach)

Try to use as little as possible - Keep it Quiet

Great types of rooms in this area are: bathroom, utility room, closet, mudroom, slightly used or guest room

Traditional Cures (placed just inside the front door): Metal (especially round in shape) or Brass Icons, 6-tube wind chime, 6-coins with red cord

If the front door is in this direction: First, oil the hinges; Second, place a Ba-Gua mirror (or 8-sided mirror) above the door, or have a spiritual icon or protector right outside the front door.

Do not add Fire Element (the color red, triangles or pyramid-shapes, candles). Remove at least some Fire Elements if you can. If you can't remove, add more Metal to offset the Fire Element.

If you are going to work around the home outside in the South, place a 6-tube wind chime on the home in that direction between the home and where you are going to work.

Use a metal singing bowl to disperse the negative energy. I've included a recording incase you don't have a metal singing bowl.

Modern Cures (You only need to **add** ONE of these to the area): Place a spiritual icon, religious symbol, Guardian angel or Animal Protector **facing** South. I like to have it be near the center of the home facing this direction, and you can place it wherever it looks good or feels best to you. I want you to start using your intuition more in order to develop it.
